EDUCATION

University of Georgia

Bachelor of Science in Computer Science

Athens, GA

Aug. 2021 - Dec. 2024

WORK EXPERIENCE

Whop

Software Engineer Intern

July 2024 - Current

- Built job board interface on the whop.com website, enhancing community engagement and facilitating seamless job posting and application processes for diverse user groups.
- Developed Whops inbound resume filtering, and outbound discovery process, filtering more than 20,000 resumes month over month, and scraped and profiled over 200,000 candidates from linkedin, github, and twitter.

Compassion International

DevOps Intern

May 2024 - Aug. 2024

- Delivered testing service API other teams could interact with to view their relevant daily test results, and helped QAOps move from Robot Framework to Playwright.
- Worked with DevOps on CI/CD pipelines as well as building a centralized Internal Developer Platform.

Private Consulting

Software Engineer

Jan. 2024 - July 2024

- Successfully delivered projects worth over \$30,000 for clients in the web development and machine learning domains.
- Built websites for clients such as macrograd.com, districtchronicle.com, and worked with Mentals AI building AI agents which behavior is described in modular markdown files.

Brainrot.js | brainrotjs.com

Founder

Feb. 2024 - June 2024

- Currently at 6,000+ users, 9,000+ video generations, and 500+ GitHub stars.
- Created the first open-source procedural text-to-video generator, creating personalized videos featuring celebrity narrators discussing user-selected topics in 1 to 3 minutes.
- Partnered with DeepAI.org who funds the application to support over 1,000 video generations per day.

Antoon's World | opensea.io/collection/antoons-world

Co-founder

Atlanta, GA

Dec. 2021 - Sep. 2022

- Grew social media to over 30,000 followers, selling 250 NFTs generating \$131,000 in revenue and \$300,000 in aftermarket sales.
- Hired and oversaw 1 web developer, 1 solidity developer, 4 community moderators, and artists with a budget of \$30,000.

LATEST PROJECTS

PPO Bunny

ppobunny.vercel.app | noahgsolomon.com/ppo

Feb. 2024 - April 2024

- Developing an interactive 3D deep reinforcement learning environment using CleanRL, Pytorch, Onnx Web Runtime and React Three Fiber as part of my

Proximal Policy Optimization course which will be released later this year.

Deep Star

Dec. 2023 - Feb. 2024

- Engineered a machine learning framework with a PyTorch-like API tailored for newcomers, emphasizing ease of use and a concise implementation of core deep learning concepts.

Smart.wtf

smart.wtf

Oct. 2023 - Jan. 2024

- Developing a learning platform for students, leveraging AI and familiar characters, boosting recall through humor and deep interactivity.

Investing Yellow

investingyellow.com

Oct. 2023

- Led a team of 4 in Georgia Tech's HackGT X Hackathon, creating a financial analysis platform integrated with AI to give users insight on their spending and investment health.

Graphzila

graphzila.com

Aug. 2023- Oct. 2023

- Built a knowledge graph generation tool that leverages AI, transforming topics into interactive visual networks.

Codefoli

codefoli.com

Dec. 2022 - Aug. 2023

- Spearheaded the architecture and launch of Codefoli, a specialized platform offering web portfolio solutions tailored for developers with a team of 4, onboarding over 1,700 users since launch.
- Integrated one-click deployment capabilities for custom domains and enabled users to access and download their React-based source code for full control and scalability.

CERTIFICATIONS

AWS Certified Developer Associate (DVA-C02)

Aug. 2023

AWS Certified Solutions Architect (SAA-C03)

July. 2023

AWS Certified Cloud Practitioner (CLF-C01)

June 2023
